

THE ART OF MOULAGE

FULL

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will discuss pre-packaged moulage sold with METI products, as well as new technologies being introduced by METI for use on our simulators. Demonstration of products will be accomplished during the session with interactive creations from participants.

ALL IN THE FAMILY: FACILITATING LEARNING ACROSS THE LIFESPAN

NEW!

Monday, March 16
9AM - 4PM

\$350
lunch included

This interactive and dynamic course will feature the use of the Program for Nursing Curriculum Integration (PNCI) in education. Included will be a discussion of how the features of the simulator and the physiologic modeling create a simulated response to meet learning objectives. Creation of a simulated environment and moulage will be demonstrated as a means to create suspension of disbelief. The participants will have an opportunity to participate in a simulated clinical experience using content from the PNCI with our family of simulators. The art of debriefing will be discussed and demonstrated using the METIVision.

ESSENTIALS OF USING THE BABYSIM® AND PEDIASIM ECS

NEW!

Monday, March 16
9AM - 12PM or 1PM - 4PM

\$200
lunch included

This three-hour course will provide participants the absolute essentials of using the BabySIM and PediaSIM ECS. It is intended for new users or those requiring a review. Set-up, power on and off procedures, use of fluid features, and

use of the METI preconfigured scenarios, in addition to the various Learning products, will be covered.

ART OF DEBRIEFING

Monday, March 16
9AM - 12PM or 1PM-4PM

\$200
lunch included

This three-hour course will provide participants the requisite theoretical background in the art of debriefing. Practical suggestions and guidelines for debriefing will be presented. Participants will also view a simulation that will serve as an example to then be debriefed by the course leaders.

BASIC SCENARIO DESIGN AND CREATION IN THE HPS6 SOFTWARE

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will provide participants the opportunity to program a scenario they have designed into the HPS6 software. Working in small groups that are facilitated by a METI faculty member, a scenario will be designed and scripted into the software. Use of METI Education and Training computers will be utilized in this course.

ADVANCED SCENARIO DESIGN AND CREATION IN THE HPS6 SOFTWARE

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will provide participants the opportunity to program complex scenarios they have designed into the HPS6 software. Working in small groups

HPSN09 PRE-CONFERENCE TRAINING COURSES

that are facilitated by a METI faculty member, scenarios will be designed and scripted into the software. Use of the customers Instructor Workstation or Remote Control laptop or the METI Education and Training computers will be utilized in this course.

ESSENTIALS OF USING THE ECS® **FULL**

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will provide participants the absolute essentials of using the ECS. It is intended for new users or those requiring a review. Set-up, power on and off procedures, use of fluid features and use of the METI preconfigured scenarios, in addition to the various Learning products, will be covered.

ESSENTIALS OF USING THE HPS®

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will provide participants the absolute essentials of using the HPS. It is intended for new users or those requiring a review. Set-up, power on and off procedures, use of fluid features and use of the METI preconfigured scenarios, in addition to the various Learning products, will be covered.

ESSENTIALS OF USING iSTAN® **FULL**

Monday, March 16
9AM - 4PM

\$350
lunch included

This six-hour course will provide participants the absolute essentials of using iStan. It is intended for new users or those requiring a review. Set-up, power on and off procedures, use of fluid features and use of the METI preconfigured scenarios, in addition to the various Learning products, will be covered.

NOW THAT I HAVE MY SIMULATOR, WHAT DO I DO? WRITE CURRICULUM!

2 Day Course (12 hours):

Monday, March 16 • 9AM - 4PM
Tuesday, March 17 • 9AM - 4PM

\$700
lunch included

This twelve-hour course is comprised of a combination of lectures, small group breakouts, group presentation and group debriefing that are designed to walk the participant through the development, execution and evaluation of a given curriculum. The purpose of this course is to explore a systematic approach to assessment, design, development, implementation and evaluation of curriculum. The components of the systematic approach, facilitator, learner, environment and learning materials all supply feedback in the way of inputs and outputs to reach a desired outcome, providing exceptional educational experiences to adult learners.
