

Use of METIVision and the Art of Debriefing

Optional 1 Day On-Site Course as an add on to Basic Training

Course Description: The six-hour course will provide assistance in console installation and hands-on instruction and participation in software setup of METIVision. A full review of the use of METIVision will be incorporated into the course. In addition it will provide participants the requisite theoretical background in the art of debriefing. Practical suggestions and guidelines for debriefing will be presented. Participants will also be involved in a simulation that will then be viewed and utilized in a debriefing session.

Course Objectives:

1. Develops an understanding of the installation procedure.
2. Differentiates between the various tabs in the software and understands how to utilize them.
3. Recognizes the importance of debriefing in the simulation experience.
4. Discusses techniques for facilitating effective debriefing.
5. Develops an understanding of the various ways METIVision can be utilized to enhance debriefing.
