

iStan® BASIC TRAINING COURSE

Intended Audience:	Instructors and Operators
Length of Course:	Two (2) Days
Course Pre-Requisite:	None

The iStan Basic Course instructs learners in the essential aspects of setup, operation and maintenance of the iStan simulator.

Content includes:

- **System Overview:** A basic overview of the iStan system and its components.
- **System Setup:** A procedural overview of various iStan subsystems.
- **Basic Operation:** Familiarization with various aspects of iStan operation, including power on and power off procedures, the Müse software application, the mannequin and ancillary and optional equipment.
- **Patient and Scenario Editing:** Utilizing conditions, introductory editing, authoring and controlling patients and scenarios.
- **Maintenance and Troubleshooting:** Basic preventive maintenance and troubleshooting is discussed, including common operator errors.

iStan® ADVANCED TRAINING COURSE

Intended Audience:	Instructors and Operators
Length of Course:	Two (2) Days
Course Pre-Requisite:	iStan Basic Training Course

The iStan Advanced Course instructs learners in the advanced aspects of operation, techniques, maintenance and troubleshooting of the iStan simulator.

Content includes:

- **Systems and Concepts Review:** Essential aspects of operating the simulator from the iStan Basic Course are reviewed.
- **Advanced Patient and Scenario Techniques:** Extensive application of editing, authoring and controlling patients and scenarios, which comprises the majority of the two days. Course participants will work in small teams to design patients and scenarios for immediate use.
- **Logistical and Integration Strategies:** Suggestions for successful integration of iStan into compatible curricula will be discussed, including available learning modules.
